

ABSTRACT

The invention relates to a motor vehicle, in which at least one microphone (8) is mounted in the headlining 94) of a passenger cell of the vehicle. The microphone is mounted in a location, which is concealed by a sun visor (6) that is pivotally mounted on the headlining (4) when said visor has been pivoted to lie against the headlining (4). At least the area (7) of the sun visor (6) that conceals the microphone is configured to conduct sound.
